LED SIGNS

An LED sign is a raised electronic display capable of scheduling or prompting any message you program. Monochrome LED signs exclusively display lit text, while Full Color LED signs can beautifully display photos, graphics, animations, and even video. This technology unleashes your ability to communicate up-to-the-minute messages-and showcases your identity at its most dynamic and engaging.

We proudly partner with Vantage LED USA. Founded in California, Vantage LED USA has been turning heads in the Industry with notable, high-scale projects. In 2014, they provided large high definition LED displays to showcase the FIFA World Cup throughout cities in Brazil.

INNOVATIVE LED DISPLAYS MAKE AN IMPACT

Mayfield Village Monument - Mayfield, Ohio

WHAT'S NEXT?

-

STEP 1 ΕP 2

• • •

Initial meeting & sign needs addressed.

Check permit. sign size, & setback requirements.

• • •
